LONGEVITY & BIOMARKERS

Six connected perspectives

Metabolic health

Cardiovascular health

Blood and organ function

Nutrition and endocrine health

Physical function

Inherited predisposition

Selected measurements, individually interpreted.

KONCIERGE
GENÈVE

LONGEVITY & BIOMARKERS

Metabolic & cardiovascular

Understand current markers alongside your wider risk context.

Glucose regulation

Lipids and selected ApoB

Lp(a) and blood pressure

Test selection follows clinical need.

KONCIERGE
GENÈVE

LONGEVITY & BIOMARKERS

Blood, organs & nutrition

Selected testing explores blood counts, organ function and relevant nutrient or endocrine questions.

A personal assessment determines the scope.

KONCIERGE
